

G.M. Arcache Shipping (Pty) Ltd

To whom it may concern.

After two break-in's during 2002, loosing close on R100 000.00 worth of computer equipment we G.M. Arcache Shipping (Pty) Ltd, on 09/09/02, invested in 13 x Compusafes at our Johannesburg office.

Shortly after installation our premises were once again targeted by a gang of computer thief's who successfully entered our building but "failed" to remove a single computer from the Compusafe's - result NO LOSS!!

Since the last break-in we have not had any further robbery attempts and we believe that the installation of the Compusave's is also acting as a deterrent.

The product is robust and to date shows no sign of wear, rust, discolouration or any other flaws.

We strongly endorse this product as an effective loss control device.
