To Whom It May Concern:

We purchased 4 computer safes from Compusafe in November 2002 as we had suffered several break-ins where computers and IT equipment had been stolen. We suffered another break-in in February 2003, after securing our computers in computer safes. The thieves were not able to remove the computer towers from the safes, and it was evident that they had tried. The response time from our security company was about 8 minutes, and had we not had computer safes, we would surely have lost our computers. We have had no problems with rust.

Many Thanks

Chris Allen
